

# Dey Krahorm Secondary School – New School Building

## Facts

Name	Dey Krahorm
Type of facility	School Building
Number of students	41 (12 boys, 29 girls)
Number of teachers	2 (1 man, 1 woman)
Facilities to be built by us	1 new building with 4 fully furnished classrooms, 4 toilets
Size of building	288m <sup>2</sup>
Budget	<b>USD 47,830</b>
Construction period	January – July 2019
Project manager	Mr. Sinoeuy My
Location	Thnork Keng Village Trapeang Prasat Commune Trapeang Prasat District Oddar Meanchey Province Cambodia

## Map

## Description

Cambodia is still, in many aspects, one of the least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain predominantly poverty-stricken as corruption and self-interest impede the country's growth. The village of Dey Krahorm, established in 2002, is located in Trapeang Prasat District of Oddar Meanchey Province, northern Cambodia. The area has a population of 9,691 residents consisting of 2,137 families, most of whom are plantation workers. The village currently has one primary school, catering to students from Dey Krahorm and three other neighbouring villages. The area does not have a secondary school, however. The nearest secondary schools are 10km and 13km away, respectively. This distance means that the progression rate to secondary school is quite low and many students progress no further than primary level education. The most feasible option for students at the moment is to have lessons in a makeshift classroom, situated in the local soldier's hall. This building currently accommodates the 41 students (12 boys and 29 girls) in grade 7, but has limited space and sparse facilities; an environment that is neither comfortable nor motivating for students wishing to make the most out of their education. The community has expressed its interest in building a brand new secondary school in the area, which would accommodate students from Dey Krathorm and its four surrounding villages. Therefore, a new school building with 4 fully furnished classrooms is urgently needed. This new addition to the community will encourage more students to progress to secondary level education thus providing current and future generations of children with better opportunities.

## Implementation

To improve the current situation, we decided to construct a new school building with 4 fully furnished classrooms and 4 toilets, which will allow students to fully benefit from their education. The project will also include a school gate and a school flag, which will provide the students and their community a school in which they can take pride. As with all our projects, the local community will be involved in the construction process. Involvement of the community is critical, as it encourages a stronger sense of ownership over the project. The community will contribute by filling the foundation for construction as well as erecting the school fence. A local contractor will be hired to manage the labour and transportation of materials, oversee the construction, and arrange for the furniture needed. Once the project is completed, the community will be responsible for the maintenance of the school. Payments will be made in instalments, according to the progress of the construction, and 5% of the total cost will be held back for six months, as a guarantee for the quality of the work. We consider this a low risk project. Access to the school's location is possible during all seasons. The expected rate of new registration is approximately 60 students per year. In its first year, the school will cater to grade 7 students only, but will expand in accordance with the enrolment rate. Construction is due to begin at the beginning of January and is expected to be completed by July 2019.

## Photos

The village's remote location means that students do not continue onto secondary education.

Students are currently studying in the soldier's hall.

## Budget

Item	USD	In %
Construction Materials	30,375	64
Interior Equipment and Furniture	2,361	5
Labour Costs	9,495	20
Transportation and Equipment Rental	1,139	2
Implementation and Monitoring Cost	1,112	2
Administration Overhead	3,348	7
<b>Total Budget</b>	<b>47,830</b>	<b>100</b>

The secondary school students have no permanent school building.

The community attends a meeting with a Child's Dream representative.
